Durable metal clamp rings for PMO-6

For STR-21G and STR-22G

One set of clamp rings is needed to attach the PMO-6 Absolute cavity pyrheliometer on the STR-21G or STR-22G sun-tracker. The STR-21G and 22G sun-trackers are the favorite choice of many research people who work with the PMO-6 during calibration campaigns. Setup will be very easy with the unique adjustable mounting bracket and removable clamp ring. The pyrheliometer can be quickly and precisely aligned.
